The Sundarbans cover an area of 38,500 square kilometers, of which about one-third is covered in water. Since 1966, the Sundarbans have been a wildlife **sanctuary**, and it is estimated that there are now four hundred Royal Bengal Tigers and about thirty thousand spotted deer in the area.

[2]The Sundarbans are home to many different species of birds, mammals, insects, reptiles and fish. Over 120 species of fish and over 260 species of birds have been recorded in the Sundarbans. The Gangetic River Dolphin (*Platanistaganeticus*) is common in the rivers. No less than 50 species of reptiles and eight species of amphibians are known to exist.
